

POSEIDON JACK-UP RESTAURANT

Based on its international experience on Jack-up Barge design and construction, POSEIDON brings a new concept for Marine Restaurants.

With its jacking system, POSEIDON Jack-up Restaurant provides a modern, comfortable and panoramic ambiance to the guests. This concept easily can rise up on its legs and this helps the concept to eliminate the negative impact of sea conditions and to have a panoramic view approximately 10 m above sea surface.

There is totally 1050 m² closed area and the concept consists of 3 decks (each 350 m² closed area). The net open area is 500 m².

The 2nd deck is designed as a disco&music hall.

Guests may arrive at the barge either by helicopter, or by boats.

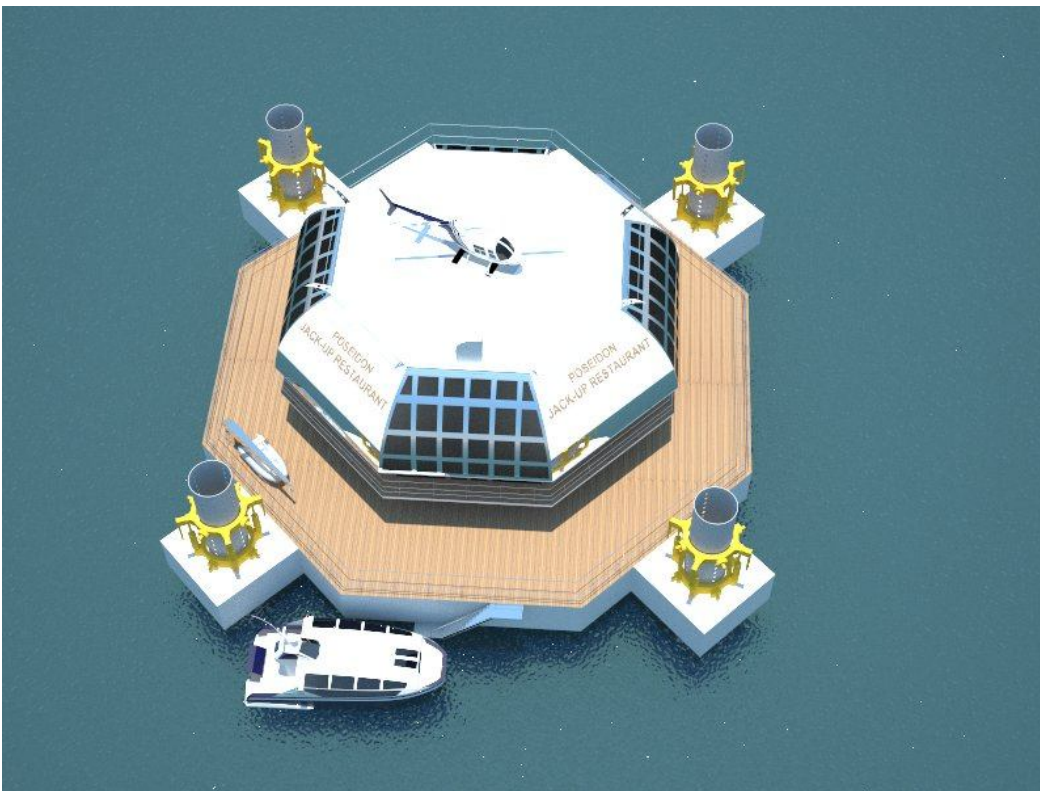

The below deck will consist of a big galley, crew cabins, stores and tanks.

The total capacity of this concept is max 1000 guests.
